

THREE PINES

WOODWORKS

Why Choose Me?

I go the extra mile to make your order stunning!

1. **Custom Orders.** Rather than just present you with a few pre-determined options and a web order form, I consult with you to make sure you get exactly what you want. I will literally scour the globe to find the desired materials!
2. **Cost Sensitive.** Your budget is important to me! I will work with you to help you choose the best possible materials to create a stunning item that will still fit within your budget.
3. **Craftsmanship.** Carving materials on the lathe is only the beginning. Finishing the item is the most time-consuming part of the process, but care and attention to detail here really makes the difference between a nice item and a stunning one!

For example:

- I wet sand all resin items from 200 to 12,000 grit and polish them with a 2-stage buffing system.
- French polished wood items get sanded from 200 to 12,000 grit and receive a minimum of five coats of my custom blended friction polish.
- Most of my pens get a hard, shiny, protective finish. This requires sanding from 220 to 600 grit and applying an average of 10 coats of cyanoacrylate. Once that cures, they are further sanded through 12,000 grit and finally polished on a 2-stage buffing system.

It's a lot of work, but I hope you will see the results speak for themselves!

The Fine Print

May as well get this out of the way now

The good:

- All orders over \$150 ship for free!
- Ballpoint Twist Pens ship with a free velvet gift sleeve.
- Bullet Pens and most Rollerball & Fountain pens ship with a gift box. Rollerball & Fountain pens over \$125 ship in a premium gift box.
- Ask me about discounts when ordering multiple items.

The meh:

- 50% of the total price down is required for me to start an order. I run this business debt free so this helps me acquire materials for your order.
- Due to the organic nature of carving, it's always a surprise to see what's waiting inside a piece of wood or resin! Once you choose a material, I cannot offer refunds just because you don't like it once you see it in a round state.
- Texas orders subject to 8.25% sales tax
- Shipping is via Priority Mail 2-Day unless otherwise requested. If your order fits in a small flat rate box, the cost is \$7. Medium flat rate boxes are \$13.

The image is a collage of various body materials. It features numerous small photographs of different types of wood, some with unique grain patterns and colors like purple, blue, and green. There are also images of animal antlers and bones, some of which are polished or treated. Resin pieces are shown in various colors and patterns, including clear resin with inclusions and colorful marbled resins. Metal pieces, some with a brushed or polished finish, are also included. The materials are arranged in a circular pattern around a central text box.

Body Materials

Through my relationships with various vendors, I am able to source exotic woods from all over the world.

I am also able to get custom resins mixed in all the colors of the rainbow with incredible depth, various patterns and even sparkle if you'd like.

Prefer something more organic? I can acquire white-tailed deer, caribou and elk antlers, Indian water buffalo horn, camel bones and more. Not exotic enough for you? How about moose poop from Alaska!

Maybe you want a pen made out of wood from a decommissioned battle ship, a sports arena or a movie set? I can do that too!

A few other customer favorites are shredded cash set in clear resin and pinecones set in colored resins.

The sky and your budget are the only limits when it comes to me finding you the right materials for that perfect item!

The body material you choose will determine the final price of items, but many materials are included in the starting price, so contact me and let's get started creating something amazing!

Ballpoint Twist Pens

Prices below will be dependent on body materials chosen

Gatsby Twist

Like its namesake, this pen exhibits mystery, flair, and elegance. With its streamlined look, striking black components and smooth twist mechanism it will surely compliment any executive's desk. A perfect gift!
